POORNA VIKASA VIDYALAYA

ಪೂರ್ಣ ವಿಕಾಸ ವಿದ್ಯಾಲಯ

OUR VISION MISSION PHILOSOPHY

POORNA VIKAS VIDYALYA has a vision to impart a holistic and balanced education that is grounded in local traditions and best global practices and make the child from a dependent learner to an independent seeker of knowledge.

Our mission is

- ▶ To lead a child from being a dependent learner to an independent seeker of knowledge.
- ▶ To equip students with necessary life skills, so that they can grow into confident young adults.

CHAIRMAN'S MESSAGE

M. Manjunath

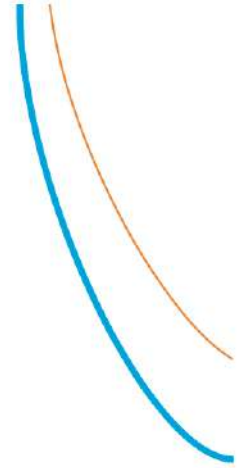

It is our mission to build an environment where young minds can learn without fear, compulsion and pressure. We want our students to love what they learn, apply them in real world situations and gain valuable life experiences. We have tried to build one of the best infrastructures in terms of Academy excellence and Sports, supported by nurturing cultural awareness among our children. Today's multi-dimensional world requires a simple yet powerful teaching methodology, which we have tried to emulate through an able staff aided by experienced external advisors. We believe in holistic education which makes a child strong in body, mind and spirit and instill immense confidence in facing the world. We have put together a blend of traditional Indian approach with western pedagogy in order to make our children ready for global careers.

CEO'S MESSAGE

M. Vineeth

The New Education Policy (NEP) promises to bring much needed reforms in the education sector. Traditionally our curriculum has focused on rote learning which inhibits young minds from thinking beyond boundaries. Learning by doing and learning by discovery is far more superior and instills the life long love for learning among students. At Poorna Vikasa Vidyalaya, we are embellishing learning by using new technologies to deliver a creative environment for children to think fearlessly and follow their passion. The Covid-19 situation has brought out the best in our students and teachers alike by pushing the realm of learning and using cutting edge technologies. They have demonstrated to the world that nothing can stop them from learning. We are excited to kindle the fire of learning.

About PVV

Poorna Vikasa Vidyalaya (PVV) is a CBSE affiliated school in J.P Nagar, Bangalore, with classes from Montessori to IX. Along with the overall development of the students, we ensure that they are honed as responsible and good citizen of India. The PVV School aims to develop an all-round personality of a student and make him/her a useful, enlightened, and disciplined citizen who is proud of our country's rich culture and civilization. Achieving academic excellence along with opportunities for the development of individual talent. Due emphasis is laid on the formation of character and inculcating a spirit of dedication for the service of society. Developing a national and scientific outlook on life and acquire a thirst for knowledge and developing the fundamental human values like compassion, tolerance, truth, honesty love for one's fellow beings and respect for our ancient thought and culture is our prime motto.

CURRICULUM

(CBSE STRUCTURE AND COURSES)

PVV has designed CBSE Curriculum Guidelines for classes Montessori to Grade X. The school is co-educational and has English as the medium of instruction, though equal emphasis is laid on teaching of Kannada and Hindi along with other subjects. It attempts to provide teachers with a complete perspective on education right from its vision, aims and objectives, scheme of studies, planning programme, methodology, variety of games and activities and evaluation.

Languages

Class	I Language	II Language	III Language
I to IV	English	Kannada	Hindi
V	English	Kannada	Hindi
VI to VIII	English	Kannada / Hindi	Hindi / Sanskrit / Kannada

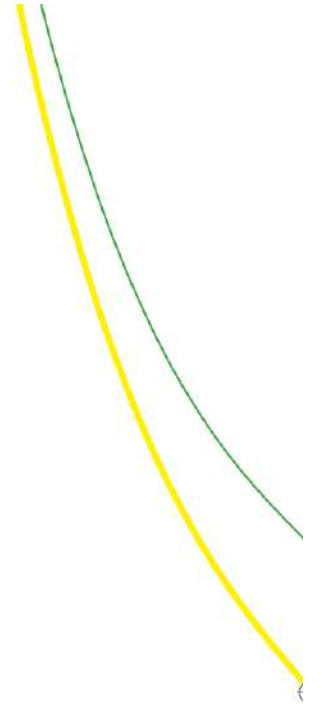

Text books

Text books recommended by PVV are prescribed for classes up to V. For the rest CBSE approved book are prescribed.

Co-Scholastic

- a) Arts and Craft
 - b) Music
 - c) Classical Dance
 - d) Computers.
 - e) Swimming
 - f) Chess
 - g) Athletics
 - h) Football
 - i) Badminton
 - j) Cricket
 - k) Yoga & Meditation
- Apart from these, competitive exams like Olympiad will also be conducted.

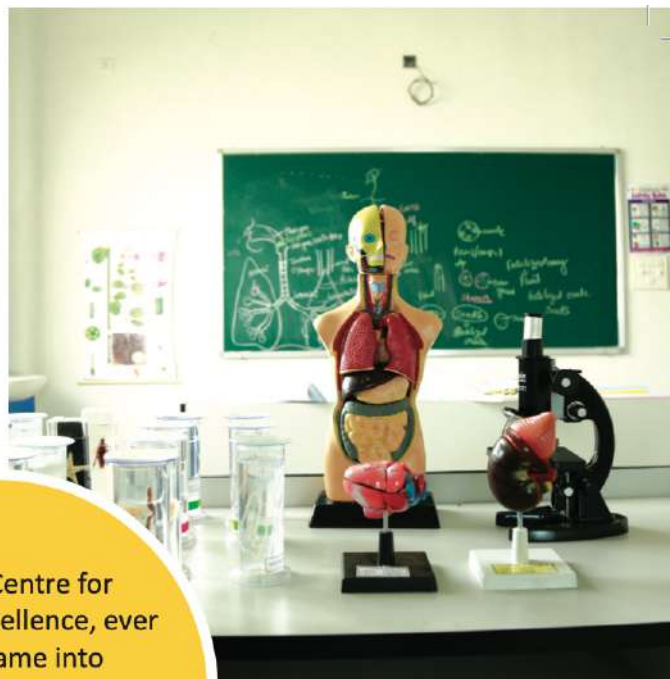

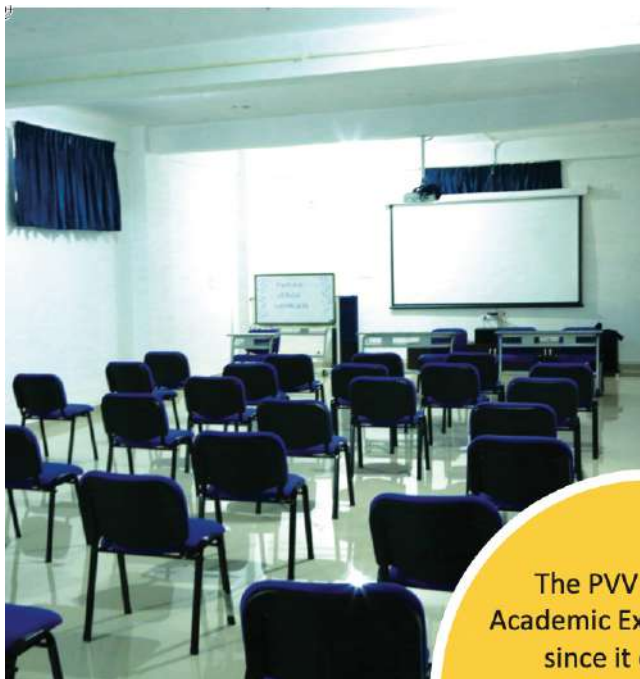

WORLD CLASS FACILITIES

- Main school building with high class facilities
- Spacious grounds for sports
- Indoor Auditorium
- Wifi Enabled Campus
- Well Trained faculty and staff

The PVV Centre for Academic Excellence, ever since it came into existence, in the year 2017, has been making all efforts to impart quality education

CULTURALS AND SPORTS

Cultural activities are an integral part of learning at the school. A dedicated auditorium and a dance practice hall, a Yoga center help students imbibe the Indian tradition and culture.

Cultural Activities

Playsmart

Playsmart is an exclusive indoor sports and fitness center. It aims at providing all-round development of a child monitored by trained coaches. It houses a centrally heated swimming pool and national games grade badminton courts.

Children learn best in a playful environment. Sports, Cultural activities are embedded into our learning system.

IN THE MEDIA

**VINEETH
MANJUNATH**
CEO
Poorna Vikasa Vidyalaya,
Bangalore

Having studied civil engineering, I began my career by joining my family business and working in the field of construction. Just a few years ago, my father decided to start a school and hence, the Poorna Vikasa Vidyalaya was established by him in the year 2018.

Watching him start the school made me want to learn about education since my academic background was completely different. I then decided to pursue my Master's in Business Administration with a specialization in the field of education from King's College, London which is ranked in the top 10 universities in the world. I completed the one year course with distinction and by the time I came back to Bangalore in the year 2019, the Poorna Vikasa Vidyalaya was steadily up and running.

I have been working as the CEO of the school since then. We follow the CBSE syllabus and we currently offer education from Montessori to class 8. We will be expanding till class 10 next year.

Coming to my passion on the personal front, I have been a sportsman all my life. I am a professional cricketer and I have played in the Karnataka Premier League. I used to play cricket in the UK as well, and I still play in the first division league in Bangalore.

While I was pursuing my engineering, I felt the atmosphere there was extremely competitive. I could see everyone competing with each other in the class for higher grades and placements. That was when I realized there was a flaw in the system as I did not find the competition healthy at all.

Now that I am working in the education sector, my main objective is to develop well-rounded learners and shape leaders of the future. That is the main goal we focus on in the school. Playing cricket has taught me a lot about leadership via how to create leaders, and what makes a good leader. So, at the school, we try to bring these lessons in and help our students grow and become leaders in the future.

One of the shortcomings in the education sector in my opinion is the curriculum, which is mostly focused on rote learning. This does not allow our children to be creative enough.

despite creativity being very important at the young age. I think it's crucial to instill creativity in children because that is what will help them in the future. With so many new technologies being introduced and implemented into our lives, it is ultimately the creative ones who possess the important life skills that will shine in the future. Those are the abilities humans need to develop, most tasks and repetitive ones can be performed by machines. And sadly, our curriculum has not focused enough on that. Of late things are slowly changing in this aspect, but when I was pursuing my education and when we started the school, that was a huge problem that was prevalent in the education system. So, at the Poorna Vikasa Vidyalaya, we constantly strive to foster creativity in our students and focus on problem-solving more than rote learning. I am fairly new to the education sector and our school is just 3 years old, but so far, dealing with the Covid-19 pandemic has been our biggest challenge. However, I am glad we have been able to sustain through it, given that there have been a number of schools closing down in the last year.

The major challenge was to get the children used to 'the new normal'. The children were not used to online classes so it was posed a very big learning disruption for them, especially for the ones who didn't understand what was going on. Our teachers worked extremely hard during the pandemic to make sure the children were able to learn, while also paying heed to their mental well-being.

Another challenge was addressing the attention span of the students. I already believe that kids these days have a low attention span, and this is a challenge that is faced even in a real classroom. Having to face it in an online class was thus a lot more taxing. To address this issue, we incorporated

various engagement activities in the online classes so as to prevent them from getting bored and easily distracted. We were constantly interacting with them and their parents. The process of learning never stopped, even during the pandemic. We have been able to continue manage it successfully. It has now been a year since the outbreak of the Coronavirus, and all our students and teachers have adapted to the new normal.

Establishing the school was my father's idea and he had a vision to start a school of his own that would bring about new changes in the education system. It is his vision that I am working towards. My aim right now is to power the growth of sports in education since sports has been my passion since the very beginning. I wish to integrate the two and provide quality education along with sports.

My pillars of support through the course of my journey have been my elder brother who is an IIT graduate, and my father who has been my constant guide and mentor through every aspect of my life.

My message to the upcoming professionals in the field of education is: Focus on the curriculum and don't be rigid about the performance of your students. Allow the children to be creative. Many schools and professionals in the education sector these days tend to only focus on numbers, that is, on the marks secured by the students in exams. But I don't think marks are what will help the children in the future. So, my advice would be to focus on creating leaders and problem solvers. Let them be creative. Recognize their creativity and reward them for it.

ADMISSIONS

Why Poorna Vikasa Vidyalaya School ?

Poorna Vikasa Vidyalaya (PVV) believes that traditional values lay a strong foundation for children to become competitive global citizens. Strong values through inspirational teaching, caring and nurturing will help the children successfully take up challenges, pressures, and competitions of the modern society. The school follows the CBSE curriculum providing students necessary foothold to face the national level examinations.

Key Features of the School
